A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of manager to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2024

Management Discussion of Fund Performance

June 6, 2024

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the year ended March 31, 2024 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "IGIM" and "the Manager" refer to I.G. Investment Management, Ltd., the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

Investment Objective and Strategies

The Fund aims to provide long-term capital growth by investing primarily in established European equity markets.

Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for long-term investors looking for capital growth who have a medium tolerance for risk. Before June 20, 2023, the Fund was deemed suitable for investors who had a low to medium tolerance for risk.

Results of Operations

Investment Performance

The performance of all series in the current and previous periods is shown in the *Past Performance* section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

For the year ended March 31, 2024, the Series F securities returned 10.7% (after deducting fees and expenses paid by the Fund). In comparison, the MSCI Europe (Net) Index returned 14.2%.

European equities rose over the period. Inflationary pressures eased as policy rate increases and cost-of-living challenges slowed consumer demand. Higher interest rates increased mortgage costs, pushing housing prices lower. Following an aggressive monetary tightening cycle, investors began to anticipate a shift in central bank policy. In March 2024, the European Central Bank decided to maintain its key interest rate. The change in investor sentiment led to a rally in higher-risk equities, particularly growth stocks with low near-term earnings potential.

Within the MSCI Europe (Net) Index, Italy, Denmark and the Netherlands were the strongest-performing markets in Canadian dollar terms, while Portugal, Finland and Belgium were the weakest. The information technology, real estate and financials sectors were the strongest performers, while consumer staples, utilities and communication services were the weakest.

The Fund underperformed the index, with stock selection in Switzerland, the Netherlands and Denmark detracting from performance. In sector terms, an overweight position and stock selection in consumer staples and stock selection

in health care detracted from performance. Stock selection in the United Kingdom and Germany contributed to performance, as did stock selection in the consumer discretionary and communication services sectors.

Over the period, the Fund's exposure to the United Kingdom decreased, and exposure to Denmark was introduced. Exposure to the health care sector increased, while exposure to the industrials sector decreased. These changes were a result of the portfolio management team's bottom-up investment approach, as the team continually assessed the Fund's holdings and found opportunities among high-quality companies with strong risk-reward and valuation profiles.

Net Assets

The Fund's net assets decreased by 6.2% during the period to \$255.7 million. This change was composed primarily of \$25.1 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and a decrease of \$42.1 million due to net securityholder activity (including sales, redemptions and cash distributions).

Fees and Expenses

The management expense ratio ("MER") for each series during the year ended March 31, 2024, was generally similar to the MER for the year ended March 31, 2023. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for all series are presented in the *Financial Highlights* section of this report.

Recent Developments

In the portfolio management team's view, some of the risks that marked the period remain a source of uncertainty, including higher interest rates than in recent history, inflationary pressures and concerns about a recession. Rather than positioning the Fund for a specific macroeconomic outcome, the team focuses on the long-term prospects of existing and potential investments and views price declines as potential buying opportunities. The Fund targets high-quality companies with proven business models and strong balance sheets that, in the team's view, can better withstand adverse market environments. The team also seeks to strike a balance between short-term protection and long-term returns.

Other Developments

With the approval of the IG Wealth Management Funds Independent Review Committee, IG Mackenzie Ivy European Class, IG Mackenzie Ivy European Class II and IG Mackenzie Ivy European Class III merged into the Fund on May 19, 2023. The Manager does not consider these mergers to be a material change for the Fund's investors.

Effective May 3, 2024, Series A was redesignated as Series B; and effective May 10, 2024, Series J DSC was redesignated as Series J NL.

Related Party Transactions

I.G. Investment Management, Ltd. is the Manager, Trustee and Portfolio Advisor of the Fund. The Fund is offered through the Consultants of Investors Group Financial Services Inc. and Investors Group Securities Inc., together referred to as the Distributors. The Manager, Portfolio Advisor, Distributors and Trustee are, indirectly, wholly owned subsidiaries of IGM Financial Inc.

The following sub-advisor provided investment services to the Fund:

- Mackenzie Financial Corporation

Mackenzie Financial Corporation is a wholly owned subsidiary of IGM Financial Inc.

The Fund paid a management fee to the Manager and Portfolio Advisor for management and portfolio advisory services (see *Management Fees*).

IG MACKENZIE IVY EUROPEAN FUND

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2024

The Fund also paid the Manager an administration fee and in exchange the Manager paid the operating costs and expenses of the Fund, except for certain specified costs.

The Fund paid the Distributors a service fee as compensation for providing or arranging for the provision of services to the Fund, including the issue or allotment of securities. A portion of the service fee for Series C is rebated by the Distributors to the Fund, for distribution to Series C securityholders quarterly, as outlined in the Prospectus.

The Trustee is responsible for the overall direction of the affairs of the Fund. The Fund paid the Trustee a fee for its services.

See *Fund Formation and Series Information* for the annual rates paid by each series (as a percentage of average net assets) for these fees.

Securityholders in Series F also pay an advisory fee directly to the Distributors. This fee is not included in the Fund's expenses.

The Manager relied on an approval issued by the IG Wealth Management Funds Independent Review Committee to proceed with the mergers of IG Mackenzie Ivy European Class, IG Mackenzie Ivy European Class II and IG Mackenzie Ivy European Class III into the Fund on May 19, 2023.

Past Performance

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

Annual Compound Returns

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2024. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

Percentage Return: ¹	1 Yr	3 Yr	5 Yr	10 Yr	Since Inception ²
Series A	9.0	1.4	3.7	3.0	n/a

The MSCI Europe (Net) Index represents large- and mid-cap equity performance across 15 developed markets in Europe. Net total returns are calculated after the deduction of withholding tax from the foreign income and dividends of its constituents.

- (1) The percentage return differs for each series because the management fee rate and expenses differ for each series.
- (2) The return since inception for each series will differ when the inception date differs and is only provided when a series has been active for a period of less than 10 years.

- These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.
- Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- Distributions were paid in cash, reinvested in additional securities of the Fund, or both.

(1) This information is provided as at the end of the fiscal period shown.

(2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by affiliates of the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.

(3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

The Fund pays a management fee, and this fee, paid by each series, is calculated as a percentage of the net asset value of the series at the close of each business day (see *Fund Formation and Series Information* for rates payable by each series). Generally, management fees pay the costs incurred to provide investment advisory and management services, as well as distribution-related services provided by the Distributors.

However, in the case of Series F, securityholders pay the Distributor an advisory fee (separate from the management fee) directly. Therefore, the management fee in that series is used for investment advisory and management services only.

For all other retail series (i.e. those that exclude Series R, P and S, if issued), approximately 64% of management fees paid during the period was used for investment advisory and management services, and approximately 36% related to distribution-related services. This may vary by series.
