ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2025

## Management Discussion of Fund Performance

June 5, 2025

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the year ended March 31, 2025 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "IGIM" and "the Manager" refer to I.G. Investment Management, Ltd., the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

### Investment Objective and Strategies

The Fund aims to provide long-term capital appreciation by primarily investing in equity securities anywhere in the world. The Fund aims to achieve this by investing primarily in investment funds, including exchange-traded funds which may be managed by the Sub-advisor or its affiliates. The Fund may also invest directly in securities.

### Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for long-term investors looking for capital appreciation who have a medium tolerance for risk.

The Fund is currently available for investment only by other IG Wealth Management Funds or institutional investors.

### Results of Operations

#### Investment Performance

The performance in the current and previous periods is shown in the *Past Performance* section of the report. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

For the year ended March 31, 2025, the Series P securities returned 12.7% (after deducting fees and expenses paid by the Fund). In comparison, the MSCI World (Net) Index returned 13.7%.

Global equity market performance was mixed over the period in response to shifting expectations regarding central bank monetary policy and geopolitical tensions. The materials sector was negatively affected by subdued commodities demand in China. Rate cuts by the U.S. Federal Reserve and the European Central Bank helped investor sentiment in the United States and Europe. Trade disputes, including concerns about U.S. tariffs, pressured global markets late in the period. Currency movements generally boosted returns in Canadian dollar terms.

Within the MSCI World (Net) Index, Africa and the Middle East and North America were the best-performing regions in Canadian dollar terms, while Japan and Asia Pacific (ex Japan) were the weakest. The financials, utilities and communication services sectors were the strongest performers, while materials, health care and consumer discretionary were the weakest.

The Fund underperformed the index, in part because of exposure to U.S. equities.

iShares S&P 500 Information Technology Sector UCITS ETF, representing about 8% of net assets at the end of the period, was the largest detractor from Fund performance. iShares Core S&P/TSX Capped Composite Index ETF, representing about 19% of net assets, was the largest contributor to performance.

The Fund increased its holding in iShares Core MSCI EAFE ETF because of the portfolio management team's concerns that recent U.S. policies could lead to higher inflation. The Fund closed an underweight position in the information technology sector, driven by market activity after the Fund eliminated a previous position in Technology Select Sector SPDR Fund and added a position in iShares S&P 500 Information Technology Sector UCITS. The Fund closed an overweight exposure to iShares MSCI Eurozone ETF during index rebalancing. The Fund's holding in iShares MSCI United Kingdom ETF increased because of strengthening economic growth in the United Kingdom.

### Net Assets

The Fund's net assets increased by 14.1% during the period to \$343.7 million. This change was composed primarily of \$39.3 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of \$3.2 million due to net securityholder activity (including sales, redemptions and cash distributions).

### Fees and Expenses

The management expense ratio ("MER") during the year ended March 31, 2025, was generally similar to the MER for the year ended March 31, 2024. Total expenses paid vary from period to period mainly as a result of changes in average assets. No management fee or administration fee, other than certain specific fund costs, is charged to the Fund. The MERs are presented in the *Financial Highlights* section of this report.

### Recent Developments

The portfolio management team believes economic developments in early 2025 have challenged investors with both shorter-term and longer-term investment horizons. U.S. policymakers have shown a willingness to accept near-term economic pain for long-term gains. Meanwhile Europe, and to a lesser extent China, have embraced economic stimulus. The team expects U.S. inflation to rise because of tax cuts and the U.S. economy to slow as a result of increased tariffs. In this environment, the Fund maintains modest overweight exposure to equities, with a preference for developed markets outside the United States.

### Other Development

Subject to regulatory approval, on July 1, 2025, the Distributors, Investors Group Financial Services Inc. and Investors Group Securities Inc., will merge into a single, dual-registered dealer named IG Wealth Management Inc. that will operate as an investment dealer with a dedicated mutual fund division.

### Related Party Transactions

I.G. Investment Management, Ltd. is the Manager, Trustee and Portfolio Advisor of the Fund. The Fund is only available for purchase by other IG Wealth Management Funds and is not available for purchase by retail investors. The Manager, Portfolio Advisor and Trustee are, indirectly, wholly owned subsidiaries of IGM Financial Inc.

Certain other investment funds, distributed by IG Wealth Management, and other qualified investors may invest in Series P of this Fund. As at March 31, 2025, this series comprised 100.0% of the Fund's net assets. The Manager relied on standing instructions approved by the IG Wealth Management Funds Independent Review Committee for the execution of all such transactions, which are based on the net asset value per security determined in accordance with the stated policies of the Fund on each transaction day. Investments by other investment funds in the Fund increase the risk of large redemption or purchase orders, which could result in larger than normal cash positions in the Fund for short periods of time. This could have an impact on the Fund's operations. However, the Manager uses various strategies to minimize the potential dilutive impact associated with large cash positions. These

strategies may include transferring securities in-kind where possible, utilizing ETFs to maintain market exposure in lieu of cash and spreading transactions in smaller increments over a period of time.

## Past Performance

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

## Year-by-Year Returns

The following bar chart presents the performance of Series P of the Fund for each of the fiscal periods shown. The chart shows, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

## Annual Compound Returns

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2025. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

Percentage Return	1 Yr	3 Yr	5 Yr	10 Yr	Since Inception
Series P	12.7	n/a	n/a	n/a	17.0
MSCI World (Net) Index	13.7	n/a	n/a	n/a	19.5

*The MSCI World (Net) Index represents large- and mid-cap equity performance across 23 developed markets. Net total returns are calculated after the deduction of withholding tax from the foreign income and dividends of its constituents.*

- (1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash, reinvested in additional securities of the Fund, or both.

## RATIOS AND SUPPLEMENTAL DATA

Net asset value per security (\$)	11.85	11.97	11.22	n/a	n/a

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by affiliates of the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## Management Fees

The Fund is only available for purchase by other IG Wealth Management Funds and is not available for purchase by retail investors. In order to avoid duplication of fees in the other IG Wealth Management Funds, the Fund does not pay a management fee.
