### **A NOTE ON FORWARD-LOOKING STATEMENTS**

*This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of manager to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.*

*The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.*

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2024

## Management Discussion of Fund Performance

November 12, 2024

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the six-month period ended September 30, 2024 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "IGIM" and "the Manager" refer to I.G. Investment Management, Ltd., the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

## Results of Operations

### Investment Performance

The performance of all series in the current and previous periods is shown in the *Past Performance* section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

For the six-month period ended September 30, 2024, the Series F securities returned 7.9% (after deducting fees and expenses paid by the Fund). In comparison, the FTSE Canada Universe Bond Index returned 5.6%, the FTSE World Broad Investment-Grade Bond Index returned 5.5%, the S&P/TSX Composite Index returned 10.0%, the S&P 500 Index returned 10.3% and the MSCI EAFE (Net) Index returned 6.8%.

Within the S&P/TSX Composite Index, materials, utilities and financials were the best-performing sectors, while health care, industrials and energy were the weakest.

Within the S&P 500 Index, utilities, information technology and real estate were the best-performing sectors in Canadian dollar terms, while energy, materials and health care were the weakest.

Within the MSCI EAFE (Net) Index, Singapore, Hong Kong and Portugal were the best-performing markets in Canadian dollar terms, while Denmark, France and the Netherlands were the weakest. The Asia Pacific (ex Japan) region outperformed other regions. The utilities, financials and communication services sectors were the strongest performers, while energy, consumer discretionary and information technology were the weakest.

The Fund outperformed the FTSE Canada Universe Bond Index and the FTSE World Broad Investment-Grade Bond Index, in part because of exposure to equities. The Fund outperformed the MSCI EAFE (Net) Index, in part because of its exposure to Canadian and U.S. equities. It underperformed the S&P/TSX Composite Index and the S&P 500 Index, in part because of exposure to fixed income investments.

Mackenzie – IG Low Volatility Canadian Equity Pool, representing about 14% of net assets at the end of the period, was the largest contributor to Fund performance. IG Mackenzie North American Corporate Bond Fund, representing 0.2% of net assets, contributed the least to performance.

## Net Assets

The Fund's net assets increased by 6.4% during the period to \$7.2 billion. This change was composed primarily of \$520.0 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and a decrease of \$84.6 million due to net securityholder activity (including sales, redemptions and cash distributions).

## Fees and Expenses

The annualized management expense ratio ("MER") for each series during the period ended September 30, 2024, was generally similar to the MER for the year ended March 31, 2024. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for all series are presented in the *Financial Highlights* section of this report.

## Recent Developments

Global equity markets generally rose over the period. Share prices increased in relation to corporate earnings, with gains in U.S. markets driven mainly by a small number of mega-capitalization stocks. The global economy was resilient as inflation continued to slow across most major markets, although unemployment moved slightly higher. Canadian equities rose despite volatility, with the financials sector and mining stocks leading market performance. The U.S. Federal Reserve, European Central Bank, Bank of England and Bank of Canada lowered interest rates, and global bond yields declined. Meanwhile, the Bank of Japan raised its policy rate to 0.25% from zero.

## Other Developments

Effective May 10, 2024, Series A, Series J DSC, Series T DSC and Series T JDSC were redesignated as Series B, Series J NL, Series T NL and Series T JNL, respectively.

Effective September 23, 2024, the Fund was renamed IG Low Volatility Portfolio – Balanced.

## Related Party Transactions

I.G. Investment Management, Ltd. is the Manager, Trustee and Portfolio Advisor of the Fund. The Fund is offered through the Advisors of Investors Group Financial Services Inc. and Investors Group Securities Inc., together referred to as the Distributors. The Manager, Portfolio Advisor, Distributors and Trustee are, indirectly, wholly owned subsidiaries of IGM Financial Inc.

The following sub-advisor provided investment services to the Fund:

- Mackenzie Financial Corporation

Mackenzie Financial Corporation is a wholly owned subsidiary of IGM Financial Inc.

The Fund paid a management fee to the Manager and Portfolio Advisor for management and portfolio advisory services (see *Management Fees*).

The Fund also paid the Manager an administration fee and in exchange the Manager paid the operating costs and expenses of the Fund, except for certain specified costs.

The Fund paid the Distributors a service fee as compensation for providing or arranging for the provision of services to the Fund, including the issue or allotment of securities. A portion of the service fee for Series C and Tc is rebated by the Distributors to the Fund, for distribution to Series C and Tc securityholders quarterly, as outlined in the Prospectus.

The Trustee is responsible for the overall direction of the affairs of the Fund. The Fund paid the Trustee a fee for its services.

See *Fund Formation and Series Information* for the annual rates paid by each series (as a percentage of average net assets) for these fees.

(Formerly IG Managed Risk Portfolio — Balanced)

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2024

Securityholders in Series F and Series FT also pay an advisory fee directly to the Distributors. This fee is not included in the Fund's expenses.

During the period, the Fund invested in other funds also managed by the Manager or affiliates of the Manager. At September 30, 2024, the Fund had \$1.5 billion (20.3% of the Fund's NAV) invested in underlying funds managed by Mackenzie. The Manager relied on standing instructions approved by the IG Wealth Management Funds Independent Review Committee for the execution of all such transactions.

Investment, if any, in unlisted open-ended funds managed by the Manager and/or affiliates of the Manager will be in series that do not pay fees. The exchange-traded funds (ETFs) into which the Fund may invest may have their own fees and expenses which reduce the value of the ETF. Generally, the Manager has determined that fees paid by an ETF are not duplicative with the fees paid by the Fund. However, where the ETF is managed by Mackenzie Financial Corporation, the ETF may distribute a fee rebate to the Fund to offset fees paid within the ETF.

During the period, the Fund received \$0.5 million in income distributions from investments in ETFs managed by the sub-advisor to offset fees paid within the ETFs. There is no assurance that these distributions will continue in the future.

## Past Performance

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

## Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash, reinvested in additional securities of the Fund, or both.

(4) Effective May 10, 2024, Series A, Series J DSC, Series T DSC and Series T JDSC were redesignated as Series B, Series J NL, Series T NL and Series T JNL, respectively.

- This information is provided as at the end of the fiscal period shown.
- Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by affiliates of the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.
- Effective May 10, 2024, Series A, Series J DSC, Series T DSC and Series T JDSC were redesignated as Series B, Series J NL, Series T NL and Series T JNL, respectively.

## Management Fees

The Fund pays a management fee, and this fee, paid by each series, is calculated as a percentage of the net asset value of the series at the close of each business day (see *Fund Formation and Series Information* for rates payable by each series). Generally, management fees pay the costs incurred to provide investment advisory and management services, as well as distribution-related services provided by the Distributors.

However, in the case of Series F and FT, securityholders pay the Distributors an advisory fee (separate from the management fee) directly. Therefore, the management fee in those series is used for investment advisory and management services only.

For all other retail series (i.e. those that exclude Series R, P and S, if issued), approximately 67% of management fees paid during the period was used for investment advisory and management services, and approximately 33% related to distribution-related services. This may vary by series.
