INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2025

## Management Discussion of Fund Performance

November 10, 2025

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the six-month period ended September 30, 2025 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "IGIM" and "the Manager" refer to I.G. Investment Management, Ltd., the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

## Results of Operations

### Investment Performance

The performance in the current and previous periods is shown in the *Past Performance* section of the report. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

For the six-month period ended September 30, 2025, the Series P securities returned 13.0% (after deducting fees and expenses paid by the Fund). In comparison, the MSCI World (Net) Index returned 15.7% and the FTSE World Broad Investment-Grade Bond Index returned 2.0%.

Global equities performed well over the period as shares of U.S. mega-capitalization companies involved in artificial intelligence (AI) reached new highs. Continued AI investment, robust corporate earnings and a weakening U.S. dollar also supported global investor sentiment. Global fixed income markets reflected easing central bank monetary policy, slowing economic growth and moderating inflation.

Within the MSCI World (Net) Index, Africa and the Middle East and North America were the best-performing regions in Canadian dollar terms, while Europe and Asia Pacific (ex Japan) were the weakest. The information technology, communication services and industrials sectors were the strongest performers, while health care, energy and consumer staples were the weakest.

The Fund underperformed the MSCI World (Net) Index, in part because of exposure to fixed income investments. The Fund outperformed the FTSE World Broad Investment-Grade Bond Index, in part because of exposure to Canadian equities and the U.S. information technology sector.

In absolute terms, Health Care Select Sector SPDR Fund, representing about 2% of net assets at the end of the period, detracted the most from Fund performance. iShares Core S&P/TSX Capped Composite Index ETF, representing about 17% of net assets, contributed the most to performance.

### Net Assets

The Fund's net assets increased by 10.1% during the period to \$878.3 million. This change was composed primarily of \$101.5 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and a decrease of \$20.8 million due to net securityholder activity (including sales, redemptions and cash distributions).

## Fees and Expenses

The annualized management expense ratio ("MER") during the period ended September 30, 2025, was generally similar to the MER for the year ended March 31, 2025. Total expenses paid vary from period to period mainly as a result of changes in average assets. No management fee or administration fee, other than certain specific fund costs, is charged to the Fund. The MERs are presented in the *Financial Highlights* section of this report.

## Recent Developments

The portfolio management team has positioned the Fund for a scenario in which the U.S. Federal Reserve continues to reduce interest rates, despite persistent inflation and tight labour markets. As the Federal Reserve reduced the federal funds rate by 25 basis points in September, it also raised its forecasts for economic growth and inflation and indicated a high likelihood of future rate reductions. This signalled a shift in the central bank's priorities toward a greater emphasis on labour market weakness than on inflation risks. Political pressure on the Federal Reserve also ramped up as the U.S. administration made it clear it wants interest rates to move lower. The team believes the recent decline in bond yields is a reflection of investors mistakenly interpreting a structural slowdown in U.S. employment gains as cyclical weakness.

## Other Developments

Effective July 1, 2025, the Distributors, Investors Group Financial Services Inc. and Investors Group Securities Inc., merged into one single, dually registered dealer, IG Wealth Management Inc. (in Quebec, IG Wealth Management Inc., a firm in financial planning) that operates as an investment dealer with a dedicated mutual fund division.

## Related Party Transactions

I.G. Investment Management, Ltd. is the Manager, Trustee and Portfolio Advisor of the Fund. The Fund is only available for purchase by other IG Wealth Management Funds and is not available for purchase by retail investors. The Manager, Portfolio Advisor and Trustee are, indirectly, wholly owned subsidiaries of IGM Financial Inc.

Certain other investment funds, distributed by IG Wealth Management, and other qualified investors may invest in Series P of this Fund. As at September 30, 2025, this series comprised 100.0% of the Fund's net assets. The Manager relied on standing instructions approved by the IG Wealth Management Funds Independent Review Committee for the execution of all such transactions, which are based on the net asset value per security determined in accordance with the stated policies of the Fund on each transaction day. Investments by other investment funds in the Fund increase the risk of large redemption or purchase orders, which could result in larger than normal cash positions in the Fund for short periods of time. This could have an impact on the Fund's operations. However, the Manager uses various strategies to minimize the potential dilutive impact associated with large cash positions. These strategies may include transferring securities in-kind where possible, utilizing ETFs to maintain market exposure in lieu of cash and spreading transactions in smaller increments over a period of time.

## Past Performance

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

## Year-by-Year Returns

The following bar chart presents the performance of Series P of the Fund for each of the fiscal periods shown. The chart shows, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash, reinvested in additional securities of the Fund, or both.

## RATIOS AND SUPPLEMENTAL DATA

Net asset value per security (\$)	13.24	11.86	11.71	10.48	10.66	11.42

(1) This information is provided as at the end of the fiscal period shown.

(2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by affiliates of the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.

(3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## Management Fees

The Fund is only available for purchase by other IG Wealth Management Funds and is not available for purchase by retail investors. In order to avoid duplication of fees in the other IG Wealth Management Funds, the Fund does not pay a management fee.
